

AI-MS Aviation Infrastructure Management Systems

“Customised Solutions for Airport Operators”

Company

Founded in 2010, AI-MS Aviation Infrastructure Management Systems GmbH (shortly: AI-MS), with its head office in Vienna, Austria, is a 100% privately owned and completely independent consulting and software engineering company.

Our Products and Services

All our software applications as well as our accompanying consulting & training services are focused on the airport industry. In this highly specialized business, we offer a wide variety of tailored airport planning & reporting solutions with full support services guaranteed for airports of all sizes.

SAMS – **S**mart **A**irport **M**anagement **S**olutions, developed by AI-MS senior experts in collaboration with scientific partners, is a globally unique best practice industry toolkit offering completely new solutions to improve the quality of airport planning

& reporting systems while saving time and money at the same time.

SAMS is a fully integrated “All-in-one-solution” that includes tools required for all elementary planning topics of an airport operator, built in a modular way which allows to use all modules stand-alone or to combine some modules and to connect them with other tools provided by third parties.

Our Team

Management

Wolfgang Edelmann works continuously in the aviation industry since 1980. During this time, he held various airport management positions as well as senior consultant in more than hundred airport development projects around the globe. He was also member of the Aviation Advisory Board of Austria and is chairman of the Aviation Infrastructure Research & Innovation Centre (AIRIC) since 2012.

Walter Richter is active in the aviation industry since 1987 in various positions with a focus on financial controlling and the real estate business. As a BI specialist, he focuses on the design, development, and implementation of tailor-made airport planning & reporting systems.

Expert Teams

AI-MS maintains a globally active expert network that is capable to efficiently manage complex projects. Each of our project teams is individually organised according to the special project requirements and the individual needs of our clients. This always ensures a high degree of flexibility and the availability of qualified personnel, but also enables us to cope with cultural and communicative challenges to meet local interests.

Memberships and Co-operations

Airports Council International

ACI is a global airport association promoting professionalism and expertise in airport management. AI-MS is an associate member of ACI-Europe and is represented in specialist committees of the organization.

AIRIC Aviation Infrastructure Research & Innovation Centre

AIRIC is an association to promote innovation and the use of new technologies in the field of air transport infrastructure and to support know-how transfer between the stakeholders of the aviation industry.

Austrian Chamber of Commerce

The Austrian Trade Promotion Organisation AUSTRIAN TRADE (AWO) is part of the Austrian Federal Economic Chamber System and co-ordinates the Austrian business community on a national and international level.
